REPORT OF BOARD OF TRUSTEES.

PENNSYLVANIA STATE LUNATIC HOSPITAL,

HARRISBURG, PA.

*To the Committee on Lunacy of the Board of Public Charities,
State of Pennsylvania:*

GENTLEMEN: The Board of Trustees of the Pennsylvania State Lunatic Hospital respectfully submits its report for the year closing September 30, 1902.

The Superintendent's report shows that there were in the institution on that date 896 patients and, that in addition, 88 were out on parole, making the total number 984.

For reasons entirely beyond our control, it is impossible for us to care for more than the number now within our walls, without detriment to those for whom we are responsible. We thoroughly appreciate the position of those unfortunates whom we are unable to promptly admit, but a careful examination of the hospital must certainly convince every fair minded person that the life, the health and the welfare of those who are now inmates, must be taken into consideration and that it is beyond our power to increase the present number without subjecting them to serious results that would naturally come from overcrowding. There is much to be said for those who are now our wards as well as those who apply for admission, and whom we are unable to accommodate. On this point we refer to the opinion of the Superintendent of this institution, which accompanies this report and whose views we thoroughly endorse.

The audited account of the Treasurer shows a balance in the treasury of \$10,340.01.

As stated in our reports of the past two years, the amounts asked for from the last Legislature for new buildings, and which were recommended by your honorable body, aggregated \$465,000.00.

Plans have been prepared and have been approved by you for new buildings which, had this sum been appropriated, would have afforded great relief and would have placed the institution on a level with the foremost ones in the country. The sum granted by the Legislature was \$253,000.00, and this at that time, before the radical increase of materials and labor, would have erected some of the buildings that were most necessary. The total appropriation that we received after being cut by the Governor was \$130,000.00. After numerous alterations and revisions of our original plans, and after two separate advertisements and attempts to receive bids that would come within our appropriation, it was found impossible to build any of the buildings in a proper manner, with the exception of that intended as a kitchen and store rooms and the morgue. We were compelled, therefore, to abandon the remaining ones, as we were unwilling to erect them unless they would answer the purpose for which they were intended, and this we ascertained could not be done.

It is unnecessary to say how great a disappointment it has been to this Board and how hard it has been on those for whom these improvements were intended but, in addition, the extra expense that will occur to the State from increased prices of all building materials, labor, etc., will be a serious item.

The store rooms and kitchen building, reduced somewhat in size, was contracted for and is well under way and will be of great assistance when finished. The amount appropriated, \$40,000.00, will cover the cost of it.

We have decided to ask from the coming Legislature the following, and earnestly request that you join with us in approving the same:

For the crection of two (2) buildings for the re-	
ception of recent and acute cases, @ \$45,000	\$90,000 00
For two (2) buildings for convalescent patients,	
@ \$87,500,.....	175,000 00
Two buildings for dangerous and destructive pa-	
tients, @ \$87,500,	175,000 00

Two (2) nurses' homes, @ \$47,500,	95,000 00
One (1) chapel,	40,000 00
For the purchase of the Fisher Farm,	10,000 00
For building of sewer,	2,000 00
For the erection of a cold storage and refrigerator plant,	25,000 00
For insurance (1902 and 1903),	2,971 27
	<hr/>
	\$614,971 27

The item of \$10,000 for land is for the purchase of sixty-five acres, including buildings, of what is known as the Fisher Farm, which not only adjoins our property on the north, but is so close to some of our buildings that it should be purchased as a protection from neighbors or conditions that might be unpleasant or inconvenient in the near future, on account of the rapid growth of the city in this direction. The farm was sold at auction, and as the hospital authorities had no funds that could be devoted to the purpose, it was purchased by one of our Trustees, who very kindly has given an option on it to us to buy at the same amount that he paid for it. The purchase of this property would be most advantageous to the State in every way, and it could now be sold for more than twice the price paid.

The city authorities of Harrisburg are spending a large sum of money in building an intercepting sewer along Paxton Creek, extending through the entire town, which is intended to relieve the creek from the many sewers now emptying into it, thereby doing away with an evil which threatens the life and health of the entire community. For many years the hospital has disposed of its sewage by depositing it into an open run, and this finds it was to the creek. Although the hospital buildings are outside the city limits, the right to tap the large sewer has been granted to us, and this affords an economical and easy way to dispose of the sewage, which was beginning to be a most serious problem. The item of \$2,000.00 is asked for to make the necessary connections.

Your Board is so well conversant with the needs of this institution that it will be useless to explain the remaining item which you are asked to approve.

We have had great difficulty during the last year in obtaining a sufficient number of employes, especially male attendants. We are situated at a great railroad centre and are surrounded by busy works which are paying much larger wages than we can afford to give; the consequence is that labor is attracted there and the inroads made by them on our people have placed us frequently in a crippled condition. This still exists, and has occasioned much anxiety to the Superintendent and placed added responsibilities on the heads of the different departments. We have little to offer to efficient and capable employes, either in the shape of wages or, on account of our crowded condition, in giving them comfortable accommodations.

It is with great sorrow that we announce the death of Dr. Jane Kimmel Garver, Physician Female Department, which occurred on October 9, 1902. She was connected with the hospital for more than twenty years, and her loss is keenly felt by this Board as well as by every one who came in contact with her.

The following minute was unanimously adopted at the yearly meeting, held in October last:

"Since our last regular meeting the dread visitor, Death, has appeared to one of the officers of our institution and beckoned away one whose going is deeply lamented by officers, employes and the many patients who received her skilled attention and care over many years.

"In the dispensation of an all-wise Providence Dr. Jane Kimmell Garver, Physician Female Department, was called to rest on the 9th day of October, 1902, at Graeffenburg, Pennsylvania, after a connection of twenty-two years with this institution, marked by a most unselfish devotion to the discharge of her duties, wherein she was always inspired with a deep sense of the responsibility resting upon her, and with sincere sym-

pathy and concern for the welfare of our patients committed to her care.

"This board has remarked the failing health of Dr. Garver in the spring-time with expressions of the liveliest sympathy and concern, when it granted to her leave of absence in the hope that she would be able to return thoroughly rested and restored to health. But God in His wisdom has ruled otherwise, and while we bow in humble submission to the immutable decree that deprives us of her presence here and service, we bear testimony to the unselfish, disinterested devotion of our late Physician of the Female Department to this institution, of the able performance of the duties of her office, of her noble character and constant courtesy.

"As a Board we deplore our loss and sympathize with those who sorrow under this bereavement, to whom a copy of these resolutions is directed to be sent."

We again express our complete approbation of the services of the Superintendent, Dr. H. L. Orth, his earnest labors to keep this hospital on the high plane to which he, in a great measure, has brought it, and his faithful and intelligent work among the unfortunate people committed to his care, commands our entire respect. The officers and employes have been satisfactory and conscientious in their different positions, and we wish to acknowledge this to the fullest extent.

Respectfully submitted,

SPENCER C. GILBERT,

SUPERINTENDENT'S REPORT FOR THE YEAR ENDING SEPTEMBER 30, 1902.

HARRISBURG, PA., Oct. 16, 1902.

*To the Board of Trustees, Pennsylvania State Lunatic Hospital,
Harrisburg, Pa.:*

GENTLEMEN: In compliance with the by-laws, I herewith submit the detailed report of the operations of the hospital for the year ending September 30, 1902, with tabular statements of the patients treated during the year, and of the condition of the hospital.

	Males.	Females.	Total.
Number of patients under our care,			
October 1, 1901,	476	459	935
Admitted during year,	81	82	163
	<hr/>	<hr/>	<hr/>
Whole number during year,	557	541	1,098
Discharged,	52	62	114
	<hr/>	<hr/>	<hr/>
Remaining September 30, 1902, ..	505	479	984
Results of the year:			
Restored,	10	21	31
Improved,	5	6	11
Unimproved,	1	1
Transferred,	2	2
Not Insane,	3	3
Died,	32	34	66
	<hr/>	<hr/>	<hr/>

Daily average resident during the year, 885.29; males, 446.09; females, 439.2.

Of this number 88 are on parole, leaving 896; 450 men and

446 women in the house. Seven more than at corresponding period in 1901.

Daily average on parole, 72; males, 47; females, 25.

Of the patients discharged recovered, seven (7) were residents of the hospital less than three months; eight (8) less than six months, and ten (10) between six and twelve months; the balance averaged a little more than three years' residence.

Of those who died, there were in the house three (3) for ten and twelve days and two months respectively; seven (7) from three to six months, and three (3) from six to twelve months; the balance, one or more years; two (2) had resided in the hospital for twenty-six years, one (1) for twenty-seven, and one (1) for thirty-eight years, and their average residence was six years and nine months.

The whole number of patients treated during the year was below the usual average, and the per centage of recoveries on the admission of new patients was 19%. The daily average under treatment was less than last year. Of this number, one sent here from an almshouse on the certificate of two physicians, and two committed on "Orders of Court," after being adjudged insane by a duly appointed "Com. de lunatico," were found to be sane and were promptly discharged.

There were less patients by twelve (12) admitted than last year, due to our inability to receive them.

Twelve (12) males and twenty-three (23) females were restrained; the males for homicidal violence, for surgical reasons and to prevent self denudation; the women for destructiveness, self mutilation, to prevent removal of clothing, for homicidal violence and surgical reasons.

One (1) man and ten (10) women were secluded from ten (10) minutes to one hundred and eight (108) hours for homicidal violence.

Nineteen (19) men and two (2) women escaped. Of this number, eighteen (18) men and two (2) women were returned to the hospital. The male patients who escaped were permitted the freedom of the grounds during convalescence, became impatient of restraint, broke their parole and anticipated

their discharge by a few days; or were harmless i. e. not dangerous to others, and, while working in the various departments of the hospital, eluded the vigilance of their nurses and escaped.

But one Coroner's investigation was deemed necessary during the year. A male patient, in a maniacal fury, rushed out of his room and attacked one of his nurses; a fellow nurse ran to his assistance, and the patient was gradually forced into his room; while struggling in the room, they tripped on the bed and fell; in the fall the patient struck his head on the edge of a commode; resistance at once ceased, and the man died within a few minutes. As the man died in a struggle with his nurses, and apparently as a result of the injury to his head, the Coroner was advised of the facts. After a careful investigation and an autopsy by his own physician, it was found that the cause of death was due to an extensive hemorrhage in the abdominal cavity, due to ulceration of the pancreatic arteries; the pancreas was a mass of cancer in the process of ulceration. The hemorrhage had been going on slowly for some hours, as indicated by the blood infiltration of the mesentery, but the larger blood vessels had probably not given way until the struggle commenced, when the violent muscular exertion caused the heart to drive the blood so forcibly through the arteries, that the blood vessels, weakened by disease, gave way and the patient bled to death. The cause of death was so apparent, that the Coroner did not deem an inquest necessary, and signed a certificate of death in accordance with the facts.

The inmates were afflicted with little sickness during the year. There was an entire absence of intestinal disease or disorder, including dysentery and typhoid fever, undoubtedly due to the purity of our drinking water, secured by careful, slow sand filtration, which removes 98% of bacterial life from the water pumped into our filter beds. See report of Bacteriologist herewith appended.

The following accidents occurred during the year. One male patient jumped out of the second story window and fractured his right fibula (Potts fracture); another patient slipped on the

floor and received the same injury, viz, Potts fracture. Both recovered without any observable defect. Of the women, two suffered with comp. fractures of tibia and fibula; one from a fall on slippery ground, the other twisted the bones asunder in an epileptic fit, four others suffered with broken arms from falls on the floor of their wards, two were pushed over by other patients.

Two other injuries of a serious nature occurred to male patients by fellow patients striking them with polishing blocks; these blocks weigh about thirty pounds; they are attached to long handles and have rubber cushions on sides to protect the washboard, when excited patients apply them too vigorously, and are used for polishing our waxed floors. They are made very heavy so that they can not easily be lifted from the floor. Much of the polishing is done by the patients to give an outlet to their psychomotor restlessness and as a matter of economy; the work is done while the other patients are in the wards. The majority of the inmates have sufficient intelligence to keep out of the way, but occasionally, by accident or inference real or imaginary (delusional), one or more interferes with the worker; a fight is the result. In the present instances, the patients who were polishing the floors, imagined the other patients were interfering with them, and struck them on the head with the blocks before the attendants could intervene; both patients were severely injured, but fortunately recovered without any bad results. This condition is much aggravated by the overcrowded state of our wards, and it is only with the greatest difficulty and by constant supervision, that serious encounters are prevented among the patients. The want of single rooms compels us to take risks that are not justified by experience, and dangerous patients are given an amount of freedom (compulsory so) that keeps us in a state of constant anxiety.

On account of the imperative demands for accommodation, but only after the most careful and painstaking observation, it was decided, with much hesitancy, to crowd nine hundred (900) beds into the house, i. e. two hundred in excess of the

number for which it was planned and built; said plan based upon well and established principles, which recognized that each patient was entitled to a certain amount of floor area and a definite cubic foot air space. Curtailment of these at once deprives the inmates of the object for which the hospital was erected, viz, rest, quiet, freedom from interference and proper amount of fresh air, when it ceases to be a hospital, and becomes a mere house with defective appointments for the detention of poor unfortunates.

As a result of failure on the part of the State to provide some comprehensive plan for the care of her insane, a plan that will keep pace with the growing population and of course the proportionate increase in the number of her insane, overcrowding of the State Hospitals has become a necessary evil, and is less objectionable, to a certain limit, than immuring her insane citizens in county jails.

The assumption, however, that State Hospitals should receive every patient properly committed, is not based upon a rational familiarity with the facts. The inmates of the hospitals are entitled to a certain protection, as above noted, to a fixed amount of air space and to a definite amount of floor area. Diminution of these, beyond a certain limit, is dangerous to life. Propinquity will cause irritation, and irritability will destroy the last atom of mental balance (temporarily at least) and develop all the brutal instincts of their nature. Increased number of nurses may modify, but will not control; their number will still further diminish the air capacity and aggravate the evils. Crowding the corridors, filling the rooms intended for one, two, three, and four patients with two, four, six and ten, respectively, may comply with the assumption, and is done, but is not humane. It is forcing numbers of helpless citizens into surroundings that will, in time, jeopardize their health, diminish their chances of recovery and shorten their average duration of life. That epidemics are avoided, that life is prolonged, that murders are prevented and that recoveries are frequently secured, demonstrate the careful supervision of the officers of the State institutions.

To turn to a pleasanter subject. Our usual Christmas exercises were observed in the ninth ward for women, which was elaborately decorated. A choir, composed of patients and nurses, delighted the patients by singing Christmas carols. Oranges, cakes and candies were distributed to them, and our President, Mr. Gilbert, Mr. Bailey, Mr. Haldeman, and our Secretary, encouraged us by their presence. The Rev. Thomas H. Robinson, of Pittsburg, formerly of this city, made a short address and opened and closed the service with prayer.

The year has been one of unusual activity. The grading of our grounds has been continued. To make way for our new buildings, it was necessary to tear down, remove and rebuild our carpenter shop. This was placed at a moderate cost, near the boiler house for the economical use of steam.

The food-way, to connect our kitchen with the building completed last year, was finished early in July, and extensive repairs were made to the buildings on the old Fisher Farm of sixty-five acres (including farm buildings) of which we were given a three years' lease, with an option to purchase at \$114.00 per acre, and any additional expenses for improvements or betterments made to the farm or building after mutual agreement by owner and the Trustees of the hospital; said charges to be paid by the owner at the time they should be incurred. Repairs to the amount of \$1,726.62 were made to the buildings under our supervision and paid by W. K. Alricks, one of our Trustees, who bought the Fisher Farm of 120 acres, adjoining our property at \$114.00 per acre, and gave us the three years' option on 65 acres including farm buildings, at the cost price paid by him. The offer is as follows:

Sixty-five acres, at \$114.00,.....	\$7,590 00
Repairs and betterments absolutely necessary,....	1,726 62

\$9,316 62

And I would suggest that you ask the Legislature for an appropriation of \$10,000.00 to avail ourselves of the exceedingly liberal offer made by Mr. Alricks.

When the appropriation for new buildings became available,

very satisfactory plans for the erection of a kitchen, and two wards for patients, were made by our architect, were approved by the Committee on Lunacy, and after due advertisement, were submitted to bidders. The rise of price in building materials, and the increased cost of labor was so rapid in 1902, that the contractors' bids were far in excess of the amounts appropriated. Two alterations in sizes of buildings and details of construction were made, but the cost of construction was still in excess of our appropriation, and contracts have been made for the erection of kitchen only, which will be finished in February next.

It is with much sadness, that I advise you of the death, on October 9, 1902, of Dr. Jane Kimmel Garver, late Physician "in medical control of the female patients." She became identified with the hospital as Assistant Physician in 1880, and in August, 1883, was elected by the Board of Trustees to this position. With the exception of about nine months, which was passed in Europe, she gave continuous service to the hospital until July last, when she was given leave of absence on account of ill health, until January next; without avail, however, as she could not regain her shattered health. Thoroughly identified with her work in the hospital, she devoted her life to the betterment of the unfortunate inmates, and died, regretted by many whose daily life was brightened by her cheerful and winning manner.

At the last session of the Legislature, application was made for an appropriation of \$465,000.00 for new buildings, as follows:

For kitchen, etc.,	\$40,000 00
For treatment of recent acute cases, two @ \$35,000,	70,000 00
For treatment of destructive and dangerous, two @ \$70,000,	140,000 00
For treatment of convalescents, two @ \$70,000, ..	140,000 00
For two nurses' homes, two @ \$35,000,	70,000 00
	<hr/>
	\$460,000 00
For a morgue,	5,000 00
	<hr/>
	\$465,000 00

Owing to supposed deficient revenue, we received but \$130,000.00. We would suggest that a report of our condition be again presented to the Legislature, and that appropriations for the erection of the same buildings be again asked for, with 40% added to the original amounts, as follows:

The erection of two (2) buildings for the reception and treatment of recent and acute cases,	
@ \$45,000,	\$90,000 00
Two (2) buildings for convalescent patients @	
\$87,500,	175,000 00
Two (2) buildings for dangerous and destructive patients, @ \$87,500,	
	175,000 00
Two nurses' homes, @ \$47,500,	95,000 00
One (1) chapel,	40,000 00
For the purchase of Fisher Farm,	10,000 00
For insurance (next two years).	2,971 27
For building sewer,	2,000 00
For the erection of a cold storage and refrigerator plant,	25,000 00
<hr/>	
\$614,971 27	

The great interest and hearty co-operation of your honorable body in the work of the hospital, with your invaluable assistance and advice, and your kindly supervision of all our work, have greatly stimulated us in our endeavors to secure successful results.

The satisfactory services and co-operation given by the officers and employes, have done much to relieve the anxieties incident to the administration of the affairs of the hospital.

The following periodicals, donated to the hospital, have been received during the year, with many thanks. They are much appreciated by our patients:

- 1 Easton Argus.
- 1 Easton Free Press.
- 1 Reformed Church Messenger.
- 1 Newport Ledger.
- 1 Raftsman's Journal.

- 1 Honesdale Citizen.
- 1 Berks and Schuylkill Journal.
- 1 Lebanon Advertiser.
- 1 Lykens Register.
- 1 Valley Spirit.
- 1 Franklin Repository.
- 1 Shippensburg Chronicle.
- 1 Church Advocate.
- 1 Harrisburg Daily Telegraph.
- 1 Delaware County American.

Very Respectfully,

H. L. ORTH, M. D.,
Superintendent and Physician.

LABORATORY WORK.

DR. H. L. ORTH, *Superintendent*:

The following is a report of the work done at the Laboratory the past year:

The work has been pursued in the same general lines as heretofore, and consists of analysis of urine, examination of blood and sputum, throat cultures, etc., and the holding of autopsies. One hundred and seventy-seven specimens of urine were received at the Laboratory and analyzed, but only 149 were primary examinations, which are given in the following table:

Of this number 57 were males and 92 females. The average specific gravity was 1,020 for both males and females. The highest specific gravity recorded was 1,042, a case of glycosuria; the lowest 1,004, both females. The highest and lowest specific gravity from the males was 1,036 and 1,006 respectively.

Albumen in a small amount was found in eleven specimens, and in a majority of these only a trace was present, indicating some slight physical disorder other than renal disease by the absence of tube casts and epithelium.

During the summer months a number of cases of malaria occurred, and an examination of the blood, a drop taken from finger tip during the rigor, revealed the corpusele of Laveran in most instances.

Examination of sputum for the bacillus tuberculosis has been made in suspected cases of phthisis, whenever a specimen could be obtained.

In all cases of sore throat, when any deposit appeared, a culture was made and grown on agar, but the bacillus diphtheriae was not found in any of the cases examined, although the nature of the deposit was somewhat doubtful, until the result of the culture test was learned.

The fact that no cases of typhoid fever have occurred among the patients the past year, clearly demonstrates the value of our filter plant which removes 98% of the bacteria, as shown by the accompanying table.

Examinations of the ice used at the hospital shows a much larger number of bacteria present than is found in the filtered water, but thus far none of the typhoid bacilli have been detected.

Eleven autopsies were held during the year, of which eight were male and three female.

Case No. 5 (see table) presented very unusual conditions and a resume of the autopsy is here given with a short clinical history of the case.

J. K. Polander. Male, aged 30 years. Admitted to hospital in October, 1897. Mental disease, imbecility.

Patient was taken suddenly ill on January 31st of this year, with pain of a very severe character, which was referred to right inguinal and lumbar regions. The patient's mental condition was such that very little information could be obtained as to his condition by questioning him.

The muscles of abdomen on right side were very rigid with marked tenderness on pressure. Right leg drawn up and was unable to straighten it out without great pain. Temperature. 103 2/5.

After forty-eight hours, slight swelling appeared in the right iliac fossa low down, which continued to slowly increase in size 'till the sixth day, when it "pointed" below Pourparts ligament and was opened by making incision. A large quantity of dark brown pus was removed of very offensive odor. This abscess continued to discharge large quantities of pus. The temperature fluctuated between 99 and 102, and the patient's condition gradually grew worse. 'till he died, March 11th, thirty-nine days after he was taken ill.

Autopsy held March 12, 1902. Rigor Mortis well developed. Head not examined. Heart in a normal condition. Lungs are dark in color (anthracosis) and free from adhesions and consolidations.

Abdomen. Liver is light brown in color and larger than normal. Weight $4\frac{3}{4}$ pounds.

On right side of spinal column at about the last dorsal vertebrae, is a large mass size of fist. To this one wall of the ascending colon is attached for two inches. This is dissected away and a jagged piece of steel $3\frac{1}{2}$ inches long, $\frac{1}{4}$ wide and 1-32 thick is found extending into the intestines about one inch, the remainder projecting into mass.

An interesting condition as to position and development of the kidneys is here observed. Both kidneys are situated in median line much lower than normal, lying across the spinal column with convexity downward, and ends attached. This malformation is known as the "horse shoe" kidney.

The piece of steel extends through edge of right kidney into muscular tissues beneath, forming a large abscess which follows sheath of muscle down and has opening in right groin below Pourparts ligament, as previously stated.

The track of this abscess is gangrenous, and odor is very offensive.

The right kidney has besides a number of abscess pockets; contains several calculi (three in number, size of bean) and an old rusty pin. The function of the organ was apparently destroyed.

Very respectfully,

C. W. GILLETTE, M. D.,

Asst. Physician.

COUNTIES IN THE DISTRICT.

The following counties compose the Southern Hospital District of Pennsylvania:

Adams,	Cumberland,	Huntingdon,	Schuylkill,
Berks,	Dauphin,	Juniata,	York,
Bedford,	Franklin,	Lancaster,	Mifflin,
Blair,	Fulton,	Lebanon,	Perry.

INSTRUCTIONS.

For the admission of patients to this Hospital three methods are provided by law:

1. By an order of the Court.
2. By an order of the Directors of the Poor of the county or overseers of the township in which the lunatic resides.
3. By an order from friends of the lunatic.

When a patient is committed by friends or poor authorities, the certificates of two physicians, duly certified by judge or magistrate, according to Form 3, must accompany the patient.

4. A history should be furnished by the friends and medical attendants of every patient upon his admission, as per Form 4.

The charges for medical care and treatment and clothing, &c., of public patients, are one dollar and seventy-five cents per week, payable at the end of every quarter, the quarters corresponding with the fiscal year of the State, and end with the months of February, May, August and November. The rate for private patients is five dollars per week, to be paid at admission for thirteen weeks, and at the beginning of every quarter thereafter.

5. Male patients should be provided with two suits of clothing, two or three suits of underwear, a pair of slippers, a pair of boots or shoes and an overcoat.

6. Female patients should have two sets of comfortable under-clothing, two dresses for everyday wear, a pair of shoes, slippers and a bonnet and shawl or coat.

7. Packages for patients sent by express must be prepaid and addressed to them in care of the Superintendent of the Hospital.

8. Letters are not written at stated times, but only in answer to inquiries, or at the occurrence of serious illness.

9. General visitors are admitted to the Hospital daily, except Sunday, from 10 to 12 a. m. and 2 to 4 p. m., but no visitor will be ad-

mitted to any of the occupied wards without permission from the Superintendent.

10. The proper papers should be legibly prepared and signed before the patient is brought to the Hospital. Blanks for the purpose can be obtained at the Hospital through letter or otherwise, or from the Trustees.

11. All communications concerning business of the Hospital, admission of patients, their condition, &c., should be addressed to

H. L. ORTH, *Superintendent,*
Harrisburg, Pa.

[FORM 1.]

....

Request for Admission.

I,, the undersigned, hereby request you to receive, an insane person, as a patient into your Hospital, believing that such detention is necessary for h.... benefit.

Subjoined is a statement respecting said

[Signed]

[Occupation]

Degree of relationship, if any, or other circumstances of connection with the patient. }

Dated this day, one thousand nine hundred and

To H. L. ORTH, M. D., *Superintendent of the Pennsylvania State Lunatic Hospital at Harrisburg.*

[FORM 2.]

Statement Concerning the Patient.

(If any particulars in this statement be not known, the fact to be so stated.)

1. Name patient with Christian name at length.
2. Sex and age.
3. Residence for the past year, or so much thereof as is known.
4. Occupation, trade, or employment.
5. Parents, if living; name and address.
6. Husband or wife; name and address.
7. Children; name and address.
8. Brothers and sisters and the residence of each of these persons.
9. If not more than one of these classes is known, the names and residence of such of the next degree of relations as are known.

10. A statement at the time at which the insanity has been supposed to exist, and the circumstances that induce the belief that insanity exists.

11. Names and address of all medical attendants of the patients during last two years.

[Signed] Name,

When the person signing the statement is not the person who signs the order, the following particulars concerning the person signing the statement, may be added, viz

Occupation, if any,

Residence,

Degree of relationship, if any, or other circumstances of connection with the patient. }

[FORM 3.]

Certificates of Physicians.

We, the undersigned, residents of Pennsylvania, hereby certify that we have, within one week prior to the respective dates herein-after mentioned, at [here insert the street and number of the house, if any, or like particulars.] in the county of separately examined of [insert residence and profession or occupation, if any,] and do verily believe that the said is insane, and the disease is of a character which in our opinion, requires that the person shall be placed in a hospital or other institution where the insane are detained for care and treatment.

We further certify, that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said, nor in any way connected as a medical attendant or otherwise with the hospital or other establishment in which it is proposed to place the aforesaid.

19. State any other particulars of the patient's history which
may have a bearing on the present attack?

BOND FOR PRIVATE PATIENTS.

[FORM 5.]

*Know all men by these presents, That we
of.....in the county
 of, State of Pennsylvania, are held and firmly bound
 unto the Pennsylvania State Lunatic Hospital and its successors
 and assigns, in the sum of five hundred dollars, for the payment of
 which we jointly and severally bind ourselves by these presents.*

*WHEREAS,of.....of
 the county ofand who is insane, has been admitted as
 a patient into the Pennsylvania State Lunatic Hospital; now, there-
 fore, the condition of this obligation is, that if the said obligors shall
 pay to the said Pennsylvania State Lunatic Hospital the sum of
 dollars and cents per week for the board, care
 and treatment of said patient, so long as shall continue by
 requiring more than ordinary care and attention, and shall
 provide for suitable clothing as shall be procured for
 by the steward of said hospital, and shall remove
 from the hospital whenever required to do so by the Superintendent;
 and if shall be removed by the request of either of us,
 or by any one, before the expiration of three calendar months after
 the reception, then, if said obligors pay board for thirteen weeks,
 unless should be sooner cured, and if they also pay, not
 exceeding fifty dollars for all damages may do the furniture
 or other property of the hospital, and for reasonable charges in case
 elopement, and funeral changes in case of death; such payment for
 clothing and board to be made in advance, quarterly, and at the time
 of removal, with the interest from the time each payment becomes
 due, and should payment be not so made and collection thereof be
 made through the attorney of said hospital, such attorney's cost
 and charges for collection not exceeding ten per centum of the
 amount due said hospital, to be also paid, then this obligation to
 be void, otherwise to remain in force.*
